No solicitation for investments

This paper contains information on Elrond, the Elrond network and planned environment and on the Elrond token (ERD) and is intended for informational purposes only. This paper does not and is not intended to constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdictions. In particular, this paper has not been registered or approved by any authority under any applicable laws and regulations. The Elrond tokens to be issued by Elrond are not intended to constitute securities and/or collective investment units in any jurisdiction. The sale of the Elrond tokens shall be governed exclusively by the terms and conditions of the Elrond token sale defined in a separate document and any information in relation to the Elrond token in this paper is merely of descriptive nature.

Due to regulatory uncertainties or restrictions, selling restrictions apply relating to the sale of Elrond tokens to any citizen or resident of the United States of America or any citizen or resident of any other jurisdiction where the acquisition of tokens or cryptocurrencies is prohibited or restricted.

Any investment round will be governed by the following terms and conditions:

Token Metrics

Total Tokens (Genesis): 20,000,000,000 ERD*

Softcap: \$1,900,000

Hardcap: \$5,150,000

Total Tokens Sold: 8,800,000,000

Percentage Sold (Private + IEO): 44.00%

	Tokens	No. of tokens	Total supply val. (\$)	Token Price (\$)	Funds Raised (\$)
Private round	19,00 %	3.800.000.000	10.000.000	0,00050	1.900.000
IEO*	25,00 %	5.000.000.000	13.000.000	0,00065	3.250.000
Total	44,00 %	8.800.000.000			5.150.000

* IEO stands for Initial Exchange Offering

* The initial extent of the token supply will be the number of tokens issued during the crowd sale and not specifically "20 Billion". Also, the total supply will be subject to a yearly inflation rate through block rewards, ideally no greater than 2.5%. Still, since a part of the transaction fees will be burned, and the greater the transaction volume, the larger the fee sum that will be burned, our model might theoretically evolve to a deflationary model over time. More details will be published on the Economics paper in the next period.
